## ABSTRACT

This document presents summaries of 28 national data collection programs, to document the amount and nature of information on individuals with disabilities included in the programs. For each program, information provided includes sponsor, purpose, collection cycle, data sources, collection methods, study design, variable domains, disability-related exclusionary rules and procedures, disability definitions and categories, and disability characteristics of sample. Grids are included for the following programs: (1) 1987 Transcript Study; (2) 1990 High School Transcript Study; (3) Baccalaureate and Beyond Longitudinal Study, Base Year, 1993; (4) Beginning Postsecondary Student Longitudinal Study, Base Year, 1990; (5) Current Population Survey; (6) Early Childhood Longitudinal Study; (7) General Social Surveys; (8) Longitudinal Study of American Youth; (9) Monitoring the Future; (10) National Adolescent Student Health Survey, 1988; (11) National Adult Literacy Survey; (12) National Assessment of Educational Progress, 1988; (13) National Assessment of Educational Progress, 1990; (14) National Assessment of Educational Progress, Trial State Assessment Program, 1990; (15) National Crime Survey, National Sample, 1986-1989; (16) National Education Longitudinal Study, Base Year, 1988; (17) National Education Longitudinal Study, First Follow-Up, 1990; (18) National Health and Nutrition Examination Survey, 1976-80; (19) National Health Interview Survey, 1989; (20) National Household Education Survey, 1991; (21) National Household Survey on Drug Abuse, 1992; (22) National Longitudinal Transition Study of Special Education Students, Wave 1, 1987; (23) National Longitudinal Transition Study of Special Education Students, Wave 2, 1990; (24) National Survey of Family Growth, Cycle IV, 1988; (25) National Health and Nutrition Examination Survey 1 Epidemiologic Followup Study, 1986; (26) Workplace Literacy Assessment, 1990; (27) Young Adult Literacy Survey, 1985; and (28) Youth Risk Behavior Survey, 1991. # Disability Summary Analyses of Select National Data Collection Programs

Prepared by:  
Kevin McGrew

St. Cloud State University

National Center on Educational Outcomes

The College of Education and Human Development  
UNIVERSITY OF MINNESOTA

August, 1995

The National Center on Educational Outcomes (NCEO) was established in October, 1990 to work with state departments of education, national policymaking groups and others to facilitate and enrich the development and use of indicators of educational outcomes for students with disabilities. It is believed that responsible use of such indicators will enable students with disabilities to achieve better results from their educational experiences. The Center represents a collaborative effort of the University of Minnesota, the National Association of State Directors of Special Education and St. Cloud State University.

The Center is supported through a Cooperative Agreement (H159C00004) with the U.S. Department of Education, Office of Special Education programs. Opinions or points of view do not necessarily represent those of the U.S. Department of Education or offices within it.

## Overview

This document includes the disability summary analysis grids of select national data collection programs. Summary analyses have been conducted to document the amount and nature of information on individuals with disabilities in our national data collection programs. The rationale for the selection of these specific data collection programs, the procedures used to review the programs and the future use of this information as it relates to the activities of the National Center on Educational Outcomes (NCEO) can be found in:

McGrew, K., Spiegel, A., Thurlow, M., Ysseldyke, J., Bruininks, R. & Shriner, J. (1992). Outcomes for children and youth with disabilities: Secondary analysis of national data collection programs. Minneapolis, MN: National Center on Educational Outcomes, University of Minnesota.

Data collection programs included in the current draft of this document, listed alphabetically, are:

1987 Transcript Study  
1990 High School Transcript Study  
Baccalaureate and Beyond Longitudinal Study, Base Year, 1993  
Beginning Postsecondary Student Longitudinal Study, Base Year, 1990  
Current Population Survey, March Supplement  
Early Childhood Longitudinal Study  
General Social Surveys  
Longitudinal Study of American Youth  
Monitoring the Future  
National Adolescent Student Health Survey, 1988  
National Adult Literacy Survey, 1992  
National Assessment of Educational Progress, 1988  
National Assessment of Educational Progress, 1990  
National Assessment of Educational Progress, Trial State Assessment Program, 1990  
National Crime Survey, National Sample, 1986-1989  
National Education Longitudinal Study, Base Year, 1988  
National Education Longitudinal Study, First Follow-Up, 1990  
National Health and Nutrition Examination Survey, 1976-80  
National Health Interview Survey, 1989  
National Household Education Survey, 1991  
National Household Survey on Drug Abuse, 1992  
National Longitudinal Transition Study of Special Education Students, Wave 1, 1987  
National Longitudinal Transition Study of Special Education Students, Wave 2, 1990  
National Survey of Family Growth, Cycle IV, 1988  
NHANES 1 Epidemiologic Followup Study, 1986  
Workplace Literacy Assessment, 1990  
Young Adult Literacy Survey, 1985  
Youth Risk Behavior Survey, 1990-1991

The summary grids for these programs are presented in this same order on the pages that follow.

**TITLE:** 1987 Transcript Study

**DESIGN:**  
Cross-sectional

**CONTACT:**  
NCES

NCES

DATA SOURCE	School records	Special education staff	School administrator / records
COLLECTION METHOD	Administrative records abstract	Questionnaire	Questionnaire / records abstract
SAMPLE DESIGN/ DESCRIPTION	34,140 11th grade or 17 year old students selected from nationally representative 1986 NAEP sample and new sample. All eligible students with disabilities from schools selected (n=6,583). 97 % response rate for transcript request (92.2% for students with disabilities). Approximately half of sample participated in 1986 NAEP.	Special Education Student Questionnaire completed for 6,066 (92.2%) of 6,583 students with disabilities who were eligible for inclusion in the sample.	448 (90%) of 497 selected schools provided information.
GENERAL VARIABLE DOMAINS PRESENT	-Courses completed. -Demographic/background characteristics.	-Handicapping condition. -Severity of cognitive, psycho-social, and physical limitation. -Estimates of reading/math grade level. -Placement in mainstream, resource, and self-contained classes. -Receipt of related services.	-School characteristics and policy information regarding graduation requirements, staffing patterns, courses offered, school and community characteristics.
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Same as used during 1986 NAEP. Students were excluded who were "functionally handicapped" to the extent that they could not participate in the assessment as normally conducted. Specific groups excluded were students with (a) limited English proficiency, (b) behavioral disorders, or (c) physical or mental handicaps, including Educable Mentally Retarded. Exclusion rate of approximately 5% during the 1986 NAEP. Separate special education schools excluded from target population.		
DISABILITY DEFINITIONS AND CATEGORIES	PL 94-142 disability definitions used and included: (a) multihandicapped, (b) mentally retarded, (c) hard of hearing, (d) deaf, (e) speech impaired, (f) visually handicapped/blind, (g) deaf/blind, (h) seriously emotionally disturbed, (i) orthopedically impaired, (j) learning disabled, (k) other health impaired.		
DISABILITY CHARACTERISTICS OF SAMPLE	Students with disabilities comprised 19.3% of the total sample. Of this group, the following disability representation was present: Multi-handicapped (1.2%), mentally retarded (19.1%), hard of hearing (0.7%), deaf (0.3%), speech impaired (0.7%), visually handicapped/blind (0.5%), deaf/blind (0.0%), seriously emotionally disturbed (9.7%), orthopedically impaired (53.4%), learning disabled (0.6%), other health impaired (2.7%).  (NCEO/K. McGraw & A. Spiegel 5-6-92)

DATA SOURCE	School records	Special education staff	School administrator / records
COLLECTION METHOD	Administrative records abstract	Questionnaire	Questionnaire / records abstract
SAMPLE DESIGN/ DESCRIPTION	21,531 12th grade or 17 year old students selected from nationally representative 1990 NAEP sample and new supplemental sample. All eligible students with disabilities from schools selected. 99.6% response rate for transcript request.	Special Education Student Questionnaire completed for students with disabilities who were included or excluded from the sample.	346 schools provided information.
GENERAL VARIABLE DOMAINS PRESENT	-Courses completed. -Demographic/background characteristics.	-Handicapping condition. -Severity of cognitive, psycho-social, and physical limitation. -Estimates of reading/math grade level. -Placement in mainstream, resource, and self-contained classes. -Receipt of related services.	-School characteristics and policy information regarding graduation requirements, staffing patterns, courses offered, school and community characteristics.
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Exclusion rate of 4.2%. Based on judgements of school administrators, students with IEPs who were mainstreamed in fewer than 50% of their academic subjects, and/or who were judged incapable of participating meaningfully in the assessment, plus those who were Limited English Proficient (LEP), were excluded. Separate special education schools excluded from target population.		
DISABILITY DEFINITIONS AND CATEGORIES	Federal disability definitions used and included: (a) multihandicapped, (b) mentally retarded, (c) hard of hearing, (d) deaf, (e) speech impaired, (f) visually handicapped/blind, (g) deaf/blind, (h) seriously emotionally disturbed, (i) orthopedically impaired, (j) learning disabled, (k) other.		
DISABILITY CHARACTERISTICS OF SAMPLE	A total of 569 students were identified as having a disability in the final sample. This represents approximately 2.6% of the total sample.

COLLECTION METHOD	Interview	Abstract of records and transcripts
SAMPLE DESIGN/ DESCRIPTION	The base year sample will be drawn from the 1993 National Post-secondary Student Aid Study (NPSAS:93). This is usually a multi-stage, stratified nationally representative sample of students in private and public postsecondary Institutions. Base year will be for students having completed a BA degree in the 1992-93 academic year. A possible sample size of approximately 77,000 has been mentioned of which about 16,100 are expected to be eligible for B&B.	<div>All information is preliminary, based on May 1991 NCES position paper.</div>

<b>TITLE:</b> Beginning Postsecondary Student Longitudinal Study, Base Year drawn from NPSAS: 90 (BPS: 90)	<b>DESIGN:</b> Longitudinal	<b>CONTACT:</b> NCES 555 New Jersey Ave NW Washington, DC 20208-5651	<b>PURPOSE:</b> To answer questions regarding post-secondary education at the national level. To gather information on persistence, progress, curriculum, attainment, and outcomes from initial time of entry into postsecondary education through leaving and entering the work force.
<b>COLLECTION CYCLE:</b> Base Year: 1990 Follow-ups: 1992, 1994, 1996, 1998	<b>SPONSOR:</b> US Dept of Educ NCES		

DATA SOURCE	Student	Parent	Institutional Records
COLLECTION METHOD	Interview	Interview	Student Records Abstract
<b>SAMPLE DESIGN/ DESCRIPTION</b>	Base year sample was drawn from the NPSAS: 90 sample which is a multi-stage, stratified, nationally representative sample of 51,430 students (77% participation rate) who entered post-secondary education in public and private institutions in 1989-90. Of those, approximately 7,650 were eligible for BPS follow-up studies	From total sample of students, a subsample of 16,106 parents (87% participation rate), primarily focusing on parents of students eligible for BPS and parents of other undergraduate dependent students.	Nationally representative sample of 1,130 (91% participation rate) public and private post-secondary education institutions which provide information on individual students.
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-Demographic characteristics.</li> <li>-Reasons for school selection.</li> <li>-Employment and income.</li> <li>-Community service.</li> <li>-Background and preparation for college.</li> <li>-College experience.</li> <li>-Future expectations.</li> <li>-Enrollment status.</li> <li>-Financial costs of education.</li> <li>-Eligibility for financial aid.</li> <li>-Parental characteristics.</li> <li>-Attitudes.</li> </ul>	<ul style="list-style-type: none"> <li>-Demographic characteristics.</li> <li>-Income and occupation.</li> <li>-Financial condition.</li> <li>-Financial support provided to children.</li> <li>-Methods of financing child's education.</li> </ul>	<ul style="list-style-type: none"> <li>-Major field of study.</li> <li>-Type and control of institution.</li> <li>-Financial aid.</li> <li>-Cost of attendance.</li> <li>-Student demographic characteristics.</li> <li>-Family income.</li> <li>-Student enrollment status.</li> </ul>
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	<div>Final methodology report not yet available. Disability specific information will be checked/verified once this report is available.</div>		
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	Information collected on whether student had functional limitations, disabilities, or handicaps in the categories of: (a) hearing impairment, (b) speech disability, (c) orthopedic or mobility limitation, (d) learning disability, (e) vision impairment that cannot be corrected by glasses, (f) other disabilities.		
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	Currently no information reported by specific disability categories. Across categories, 5.1% of graduate students and 6.6% of undergraduates in total sample classified as having some form of functional limitation, disability, or handicap. (NCEOK. McGrew 2-5-94 Rev)		

<b>TITLE:</b> Current Population Survey (CPS)		<b>DESIGN:</b> Cross-sectional	<b>CONTACT:</b> CPS Branch Bureau of Census Washington, DC 20233	<b>PURPOSE:</b> To collect information on the employment situation and the demographic status of the population, and specifically in the March CPS, to gather data on work experience, income, non-cash benefits, and migration.
<b>COLLECTION CYCLE:</b> Monthly, since the 1940's		<b>SPONSOR:</b> US Bureau of the Census		
<b>DATA SOURCE</b>	Adult member of household			
<b>COLLECTION METHOD</b>	Interview			
<b>SAMPLE DESIGN/ DESCRIPTION</b>	A multi-stage stratified nationally representative sample of the civilian noninstitutionalized U.S. population. Approximately 114,500 individuals 15 yrs. old or above are interviewed each month. Demographic data collected on approximately 33,500 children (0-14 yrs.) each month.			
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"><li>-Family and household demographics and characteristics.</li><li>-Current employment status.</li><li>-Income level and sources.</li><li>-Non-cash benefits.</li><li>-Work experience.</li><li>-Relationship/marital status.</li><li>-Work status.</li><li>-Work disability.</li></ul>			
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	None reported.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	No specific disability categories used. Information on "reasons for not working" includes health problems or a disability.			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	In 1988 survey, 8.6 % reported a work disability. In 1991 survey, 7.0 % reported a health problem or disability that prevented or limited their employability.  (NCEOK, McGrew & A. Spiegel 2-02-94 Rev)			

<b>TITLE:</b> Early Childhood Longitudinal Study (ECLS)		<b>DESIGN:</b> Longitudinal	<b>CONTACT:</b> NCES 555 New Jersey Ave NW Washington, DC 20208-5651	<b>PURPOSE:</b> To collect information on the education experiences of young children to answer questions concerning how children's health, family, and educational histories affect their chances of succeeding in school.
<b>COLLECTION CYCLE:</b> Annual follow-ups		<b>SPONSOR:</b> US Dept of Educ NCES		

DATA SOURCE	Child	Parent/guardian	Teachers, care providers, and health care providers	Child care programs/schools
COLLECTION METHOD				
SAMPLE DESIGN/ DESCRIPTION	Proposed data collection for nationally representative birth and kindergarten cohorts. The birth cohort would include approximately 10,000 to 15,000 children (possibly in a collaborative effort with the National Center for Health Statistics). The school-based cohort would include approximately 25,000 kindergarten children. Plans include collecting data twice on the kindergarten cohort during the base year (beginning and end of the school year). Plans may include the incorporation of several smaller in-depth samples for special studies.			
GENERAL VARIABLE DOMAINS PRESENT	Information not yet available. Study is still in the planning stage.			
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Information not yet available. Study is still in the planning stage.			
DISABILITY DEFINITIONS AND CATEGORIES	Information not yet available. Study is still in the planning stage.			
DISABILITY CHARACTERISTICS OF SAMPLE	Information not yet available. Study is still in the planning stage.			

All information is preliminary, based on May 21, 1992 draft proposal paper.

(NCEO/K. McGrew & A. Splegel 7-31-92 Rev)

<b>TITLE:</b> General Social Surveys (GSS)		<b>DESIGN:</b> Cross-sectional	<b>CONTACT:</b> NORC Univ. of Chicago 1155 E. 6th St. Chicago, IL 60637	<b>PURPOSE:</b> The purpose of this survey is to assess changes and constants in social opinions and characteristics and to distribute new, high quality, and interesting information related to social opinions and characteristics. A general social indicator survey.
<b>COLLECTION CYCLE:</b> Annually since 1972		<b>SPONSOR:</b> National Science Foundation		
<b>DATA SOURCE</b>	Adults in U. S. households			
<b>COLLECTION METHOD</b>	Telephone survey			
<b>SAMPLE DESIGN/ DESCRIPTION</b>	A multi-stage, nationally representative probability sample of adults 18 years of age and older living in non-institutional arrangements. The sample includes approximately 1,500 individuals.			
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"><li>-Demographic characteristics</li><li>-Ecology</li><li>-Family and Life Cycle (e.g., age, marriage and family structure, sex, and children and fertility)</li><li>-Socioeconomic status (e.g., labor force, education, income, class - subjective rank, and housing)</li><li>-Primordial groups (e.g., ethnicity, religion, and race)</li><li>-Politics (e.g., domestic and international attitudes and beliefs)</li><li>-Social Psychology (e.g., group memberships and morale)</li><li>-Other (e.g., crime, punishment, and violence, health, leisure, and miscellaneous)</li></ul>			
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	None used.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	None used.			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	No disability specific information reported.  (NCEOK McGrew 8-09-94 Rev)			

**TITLE:** Longitudinal Study of American Youth (LSAY)

**DESIGN:**  
Longitudinal

**CONTACT:**  
Northern Illinois  
University  
Public Opinion Lab  
DeKalb, IL 60115

**PURPOSE:** To assess student's attitudes toward science and mathematics as areas of study and possible career choices, particularly as they relate to public policy issues.

**COLLECTION CYCLE:** Base Year: 1987  
Annually until 1991.

**SPONSOR:**  
National Science  
Foundation

Foundation				
DATA SOURCE	Student	Parent	Teacher	Principal
COLLECTION METHOD	Questionnaire/Tests	Questionnaire	Questionnaire	Questionnaire
SAMPLE DESIGN/ DESCRIPTION	2-stage stratified nationally representative sample of 7th & 10th graders in 1987 (Base yr) from public schools. 7th grade n=3,116; 10th grade n=2,829. Total n=5,860 in base year.	Parents of students described in student sampling plan. Of the 3 parent questionnaires conducted from 1988 to 1990, at least one interview was completed by 6,168 parents (90%).	Questionnaire 1 was completed by all science and math teachers in participating schools (1,379; 76 % response rate). Questionnaire 2 was completed by teachers of sampled students for each class. (76-89% response rate for yrs 1-3) (n =1,699 - 2,081).	94 % of principals in the participating schools.
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"><li>-Academic achievement in science and mathematics.</li><li>-Demographic/background characteristics.</li><li>-Educational/occupational plans.</li><li>-Attitudes toward school.</li><li>-School related activities.</li><li>-School performance.</li><li>-Attitudes toward math/science.</li><li>-Self-esteem.</li><li>-Parental guidance/involvement.</li></ul>	<ul style="list-style-type: none"><li>-Family demographic/background characteristics.</li><li>-Opinion/values of school.</li><li>-School/parent involvement.</li><li>-Educational/Occupational goals.</li><li>-Involvement in student plans.</li><li>-Opinion/values.</li><li>-Use of magazines, newspapers, TV programs.</li></ul>	<p>Questionnaire 1</p> <ul style="list-style-type: none"><li>-teaching experience.</li><li>-work conditions in school.</li><li>-educational background.</li></ul> <p>Questionnaire 2</p> <ul style="list-style-type: none"><li>-ability level of class.</li><li>-textbook used.</li><li>-course objectives.</li><li>-teacher's expectations for the students.</li></ul>	<ul style="list-style-type: none"><li>-Demographics.</li><li>-School characteristics.</li><li>-Special programs.</li><li>-School resources.</li></ul>
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	No formal procedures used. Exclusion from base year sample was attributed to "declining" or "refusing". 83 % of original target sample participated in base year. In addition, of the original 6,860 participants, 506 (7.3%) were classified as permanent refusals; 205 of these were from schools that decided to drop out of the study.			
DISABILITY DEFINITIONS AND CATEGORIES	Student report of participating in special classes for the educationally handicapped or for the physically handicapped.			
DISABILITY CHARACTERISTICS OF SAMPLE	In 1988, 4.6 % reported enrollment in classes for educationally handicapped; 3.9 % in classes for physically handicapped. In 1989, 3.6 % reported enrollment in classes for educationally handicapped; 2.0 % in classes for physically handicapped. (NCEOK, McGraw & A. Spiegel 8-18-92 Rev)

<b>COLLECTION CYCLE:</b> 1992, 1996		<b>SPONSOR:</b> US Dept. of Education NCES		
<b>DATA SOURCE</b>	Adult			
<b>COLLECTION METHOD</b>	Interview / Tests			
<b>SAMPLE DESIGN/ DESCRIPTION</b>	Multi-stage, stratified, clustered, nationally representative sample of adults (16 years of age and older) in the United States. Sample plan is to assess 15,000 adults. Approximately 15,900 subjects (12,200 aged 16-24; 2,700 65+, 1,000 incarcerated adults). Twelve individual states volunteered to participate in separate state sampling of 1,000 adults aged 16-64.			
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-General Language background.</li> <li>-Labor force participation.</li> <li>-Educational background and experiences.</li> <li>-Demographic information.</li> <li>-Prose literacy.</li> <li>-Document literacy.</li> <li>-Quantitative literacy.</li> <li>-Social &amp; political participation.</li> <li>-Literacy activities and collaboration.</li> </ul>			
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	Individuals excluded if they are unable to complete background questionnaire or test exercises due to: (a) language problem, (b) physical disability, (c) mental disability, or (d) reading disability. Exclusion decision is made by interviewer. A noninterview report describing disability in more detail is completed for each excluded individual. For individuals determined to be unable to respond due to severe literacy problems, the plan is to treat their data as if they got none of the items correct. Individuals living in group residences are excluded from the sampling plan.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	Self report of learning disability, mental or emotional condition, mental retardation, speech disability, physical disability, long term illness (6 months or more), other health impairment, functional vision impairment, functional hearing impairment.			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	Data not yet available.			

**TITLE:** National Assessment of Educational Progress - 1988 (NAEP-88)

**DESIGN:** Cross-sectional

**CONTACT:** NAEP - ETS  
Box 2923  
Princeton, NJ  
08541

**PURPOSE:** To monitor the knowledge, skills, understanding, and attitudes of the nation's children and youth ("Nations Report Card"). To make objective data about student performance available at the national and regional levels. Key areas: instructional practices, at-risk students, teacher work-force, effective schools.

**COLLECTION CYCLE:** Since 1988, assesses grades 4, 8, and 12. Since 1990, every two years (different subject areas each time) - 1988; 1990; 1992; etc.

**SPONSOR:** US Dept of Educ  
NCES - ETS

<b>DATA SOURCE</b>		Student	Teacher	School Administrator
<b>COLLECTION METHOD</b>	Questionnaire			
<b>SAMPLE DESIGN/ DESCRIPTION</b>	4-stage stratified probability sample. Nationally representative samples for 3 age-grade cohorts (9/4th; 13/8th; 17/12th) from public/private schools (approx. 86 % school participation). Total n=121,062 (Main samples n=87,323; Bridge samples n=33,739).	769 reading teachers of 3,901 students in 4th grade cohort (main assessment sample). 756 writing teachers of 3,570 students in 8th grade cohort (main assessment sample).	994 school administrators completed questionnaires from 1,061 schools in main assessment sample. 429 questionnaires from 457 schools in bridge samples. Schools selected during second stage of sampling plan.	
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-Academic performance in five subject areas (reading, writing, civics, U.S. history, geography).</li> <li>-Demographic/background characteristics.</li> <li>-Subject-specific background &amp; attitude information which varied by subject area (e.g., instructional experiences, topics studied, amount of homework, enjoyment, personal &amp; social use of skills, subject courses taken, etc.).</li> </ul>	<ul style="list-style-type: none"> <li>-Teacher characteristics.</li> <li>-Classroom curriculum and teaching methods.</li> <li>-Characteristics of students excluded from data collection (Excluded Student Questionnaire).</li> </ul>	<ul style="list-style-type: none"> <li>-School characteristics and policy information regarding administration, staffing patterns, special programs, subject requirements, and school resources.</li> </ul>	
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	Based on judgements of school staff, students with limited English proficiency, mild retardation (educable), or functional disability (temporary or permanent physical disability) were excluded. Exclusion rates varied by age/grade cohorts from 3.0 % to 6.3 % of originally selected students, with average exclusion rate of 5.7 % . Separate Excluded Student Questionnaire completed by school personnel for each excluded student. Separate special education schools excluded from target population.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	None used to describe final sample. Only disability related information gathered in reference to excluded students via Excluded Student Questionnaire which included information on ethnicity, reason for exclusion, functional grade levels, percent of mainstreaming and special education, areas of special education service, type of disability (multidiscabled, mentally retarded, hard of hearing, deaf, speech-impaired, visually handicapped/blind, deaf/blind, emotionally disturbed, orthopedically impaired, learning disabled, other), degree of disability (mild, moderate, severe, profound).			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	No data reported.

**PURPOSE:** To monitor the knowledge, skills, understanding, and attitudes of the nation's children and youth ("Nations Report Card") at the state level to allow for inter-state comparisons.

**COLLECTION CYCLE:** 1990 - 8th graders in math; 1992 - 4th graders in math and reading, 8th graders in math

**SPONSOR:**  
US Dept of Educ  
NCES - ETS

DATA SOURCE	Student	Teacher	School Administrator
COLLECTION METHOD	Test/Questionnaire	Questionnaire	Questionnaire
SAMPLE DESIGN/ DESCRIPTION	40 stratified probability samples of public school 8th graders within each of 40 participating jurisdictions (37 states; DC; 2 territories). Average state sample had weighted participation rates of 97.6% (schools) and 93.9% (students). Total n=100,849 students assessed across jurisdictions (approx. 2,500 per jurisdiction).	Average state weighted percent of assessed students with matched mathematics teacher questionnaire was 88.9 %.	Average state weighted percent of assessed students with matched school characteristics and policy questionnaire was 98.5%.
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"> <li>-Academic performance in math according to 3 abilities and 5 content areas.</li> <li>-Demographic/background characteristics.</li> <li>-Type of math experiences and practices; time spent studying math; attitudes toward math.</li> </ul>	<ul style="list-style-type: none"> <li>-Teacher characteristics.</li> <li>-Classroom curriculum and teaching methods.</li> <li>-Characteristics of students excluded from data collection (Excluded Student Questionnaire).</li> </ul>	-School characteristics and policy information regarding administration, staffing patterns, special programs and services, school resources and facilities, community services, school policies, attendance/enrollment data, and school-wide problems.
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Based on judgements of school administrators, students with IEPs who were mainstreamed in fewer than 50 % of their academic subjects, and/or who were judged incapable of participating meaningfully in the assessment, plus those who were Limited English Proficient (LEP), were excluded. Average jurisdiction exclusion rate of students with IEP was 4.4 % of each total jurisdiction sample. Across jurisdictions, 52.7 % of students with IEPs excluded, and 52.6 % of LEP students excluded. Excluded Student Questionnaire completed by school staff for each excluded student. Separate special education schools excluded from target population.		
DISABILITY DEFINITIONS AND CATEGORIES	Students classified as IEP/LEP or not. Disability specific information gathered in reference to excluded students via Excluded Student Questionnaire which included information on ethnicity, reason for exclusion, functional grade levels, percent of mainstreaming and special education, areas of special education service, type of disability (multidisabled, mentally retarded, hard of hearing, deaf, speech-impaired, visually handicapped/blind, deaf/blind, emotionally disturbed, orthopedically impaired, learning disabled, other), degree of disability (mild, moderate, severe, profound). No specific data reported yet.		
DISABILITY CHARACTERISTICS OF SAMPLE	8.3 % of final sample on IEP. 1.4 % of final sample designated as LEP.

NCES

DATA SOURCE		Student	Teachers	School Administrator
COLLECTION METHOD	Questionnaire			
SAMPLE DESIGN/ DESCRIPTION	Up to two teachers of each follow-up core sample member were asked to complete the questionnaire. Approximately 12,690 teachers participated.			
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"> <li>-Demographics</li> <li>-Achievement in math, science, reading, and social studies.</li> <li>-Home characteristics</li> <li>-Family &amp; friends</li> <li>-Work status</li> <li>-Opinions, attitudes, &amp; values</li> <li>-School atmosphere</li> <li>-School work</li> <li>-School performance</li> <li>-Special programs</li> <li>-After-school activities</li> <li>-Life goals</li> </ul>	<ul style="list-style-type: none"> <li>-Background information</li> <li>-Parental school involvement</li> <li>-School climate</li> <li>-Student achievement</li> <li>-Instructional methods and content</li> <li>-Teachers' assessments of students' school-related behavior, academic performance, and educational/career goals.</li> <li>-Home characteristics</li> <li>-Work status</li> </ul>	<ul style="list-style-type: none"> <li>-School, student and teacher characteristics</li> <li>-School policies and practices</li> <li>-School grading &amp; testing structure</li> <li>-School programs and facilities</li> <li>-Parent involvement in school activities</li> <li>-School climate</li> </ul>	The questionnaire was sent to chief administrators of all schools with follow-up sample students. 1,296 school administrator questionnaires were completed. 17,663 students were covered (92% of the student sample).
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Same as NELS: 88 base year. Students for whom tests would be unsuitable (i.e. mentally handicapped students) and students whose physical or emotional problems would have made participation in survey unduly difficult. Because ineligible students were excluded prior to base year sample selection, a simulated sample including these ineligible students was selected. However, with respect to base year ineligibles, an attempt was made to include them in the follow-up sample. Eligibility status of the students in this sample was reassessed and student questionnaire data was obtained from those deemed able to complete the survey. Demographic data was obtained from the rest of the subsample(those unable to complete the survey). A total of 343 of the 674 base year ineligible students were found to be eligible for this follow-up.			
DISABILITY DEFINITIONS AND CATEGORIES	Participation in a program for educationally handicapped or physically handicapped students.			
DISABILITY CHARACTERISTICS OF SAMPLE	1.7% of sample reported having been in a program for educationally handicapped students. 1.2 % reported having been in a program for physically handicapped students.

**TITLE:** National Health Interview Survey (NHIS) - 1989

**COLLECTION CYCLE:** Annually since 1957

**DESIGN:**  
Cross-sectional

**CONTACT:**  
Public Health Serv.  
NCHS

**PURPOSE:** To provide information on the health of the civilian noninstitutionalized population of the United States. Surveys from 1985-1994 designed to serve as the cornerstone of the National Center for Health Statistics Integrated Survey Design (ISD) program, which will allow for the linkage of NCHS surveys

**SPONSOR:**  
US Dept. Health  
& Human Serv.

**DATA SOURCE**

Household members

**COLLECTION METHOD**

Interview

**SAMPLE DESIGN/  
DESCRIPTION**

A continuous, stratified, multi-stage probability sample. Each weekly series of interviews selected to be nationally representative of household members from less than 1 year of age to over 75 years. All adult members of a selected household who are 17 years of age or older, and who are home at the time of the interview, are invited to participate. Information on children and adults not home provided by adult proxy (19 years old or above). Proxies also respond for individuals living under their care who are unable to respond. 116,929 persons from 45,711 participating households in 1989. 95-98 % of selected households typically respond.

**GENERAL VARIABLE  
DOMAINS PRESENT**

Each survey consists of two parts. Part one is relatively the same each year and consists of demographic and basic health questions (disability days, physician visits, acute/chronic conditions, long-term limitation of activities, short-stay hospitalization data). Part two covers special topics that differ each year (e.g., AIDS, aging, dental care, etc.). 1989 special topic questions included: health care coverage, adult immunization, severe and persistent mental illness, dental health, diabetes, orofacial pain, digestive disorders, and knowledge and attitudes about AIDS.

**DISABILITY RELATED  
EXCLUSIONARY  
RULES AND  
PROCEDURES**

Individuals excluded who are either (1) patients in long-term care facilities, (2) on active duty with U.S. armed services, or (3) a U.S. national living in a foreign country. There are no disability-specific exclusion criteria. Information regarding individuals with disabilities collected through the use of adult proxies.

**DISABILITY  
DEFINITIONS AND  
CATEGORIES**

Variables that are related to special education disability categories include (a) type of mental illness, (b) blindness, (c) other visual impairment, (d) deafness, (e) other hearing impairment, (f) stammering & stuttering, (g) other speech impairment, (h) mental retardation, and (i) variety of physical or orthopedic impairments.

**DISABILITY  
CHARACTERISTICS  
OF SAMPLE**

Detailed sample description by disability-related variables not reported. Selected information presented in 1989 report found that the school age sample (under 18 years) contained the following percent of three categories: 0.9 % visual impairment, 1.6 % hearing impairment, and 1.7 % speech impairment

<b>TITLE:</b> National Household Education Survey (NHES) - 1991	<b>DESIGN:</b> Cross-sectional	<b>CONTACT:</b> NCES 555 New Jersey Ave NW Washington, DC 20208-5651	<b>PURPOSE:</b> To collect data pertaining to early and adult education experiences and issues. One time topics of special interest will be covered in different annual surveys. The 1991 base year survey targeted information on the care and education of 3-to-8 year olds, and the participation of adults in education activities.
<b>COLLECTION CYCLE:</b> Base Year: 1991, 1993 1995 and annually thereafter	<b>SPONSOR:</b> US Dept of Educ NCES		

DATA SOURCE		Parent or Guardian (Early Education Survey)	Adult (Adult Education Survey)
COLLECTION METHOD		Interview	Interview
<b>SAMPLE DESIGN/ DESCRIPTION</b>		Using random digit dialing sample selection, a nationally representative cluster sample of 60,314 households was identified through a two-stage sample design. The selected households were then screened for those with a 3-to-8 year old. Approximately 13,892 households were included in the parent interviews for the collection of information on 3-to-8 year olds.	Of the sample of 60,314 households (described for parent or guardian) 35,578 were screened for participation. A knowledgeable adult from each household completed information about all adult (16 years of age or above) household members. An extended interview was conducted with each adult who participated in any adult education activity in the last year (n = 9,774). An extended interview was also conducted with a selected sample of nonparticipants (n = 2,794).
<b>GENERAL VARIABLE DOMAINS PRESENT</b>		<ul style="list-style-type: none"> <li>-Household and family characteristics.</li> <li>-Child care arrangements.</li> <li>-Early childhood education programs.</li> <li>-School experiences.</li> <li>-Educational environment of the home.</li> <li>-Health.</li> <li>-Disability characteristics.</li> <li>-Parent education and employment.</li> <li>-Parental involvement in educational programs.</li> </ul>	<ul style="list-style-type: none"> <li>-Previous educational background.</li> <li>-Current education participation.</li> <li>-Reason for participation.</li> <li>-Employment.</li> <li>-Demographic characteristics.</li> <li>-Characteristics of adult courses and activities.</li> <li>-Perceived benefits of adult education.</li> <li>-Perceived barriers to participation.</li> </ul>
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>		None reported.	
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>		For child survey: Learning disability, mental retardation, speech impairment, severe emotional disturbance, hardness of hearing, deafness, orthopedic impairment, visual impairment/blindness, deafness and blindness, other health problems, multiple handicaps. For adult survey: If not attending school, not employed, not keeping house or caring for children, or not retired, the response category of "sick or disabled" or "something else" is used.	
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>		5.0% (pre-primary age) and 6.6% (primary school age) reported as having a "handicap". For "pre-primary" and "primary school age" samples, respectively: learning disabled (0.6/1.2%); mentally retarded (0.1/0.2%); speech impaired (1.4/0.8%); severe emotional disturbance (0/0%); hardness of hearing (0.3/0.5%); deafness (0.1%/0.0%); orthopedically impaired (0.3/0.3%); visual impairment/blindness (0.3/0.5%); other health impaired (1.5/2.3%); multiple handicaps (0.4/0.7%) (NCEO/K. McGrew 11-18-94 Rev)

COLLECTION METHOD	Questionnaire		
SAMPLE DESIGN/ DESCRIPTION	A multi-stage nationally representative sample of civilian, non-institutionalized individuals aged 12 or older. The 1992 survey included 28,832 persons. The overall response rate was 79 percent. Six special samples in large metropolitan areas were also included in the 1992 survey.		
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"><li>-Demographic characteristics</li><li>-Frequency of use of various licit or illicit drugs</li><li>-Problems associated with drug use</li><li>-Drug abuse treatment experience</li></ul>		
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	No disability specific exclusion criteria reported.		
DISABILITY DEFINITIONS AND CATEGORIES	None used.		
DISABILITY CHARACTERISTICS OF SAMPLE	No disability specific information reported.

DATA SOURCE	Parent/Guardian	School Records	School Administrator	Parent (nonresponse sample)
COLLECTION METHOD	Structured Interview	Administrative records abstract	Questionnaire	Structured Interview
SAMPLE DESIGN/ DESCRIPTION	2-stage stratified nationally representative sample of special education students (gr 7-12; ages 13-21) in 85-86 school year. 303 of 450 (67.3%) LEA universe cells represented in sample. 26.2% of selected special schools participated. Data for 6,438 students of originally selected 12,790 (50.3 %).	Data from 6,241 youth in student selected sample (48.8 % of 12,790 originally selected students). Information from most recent secondary school attended in 85-86.  ← 14,064 students, or 39 % of available youth, with complete data from three major components →	1,432 school administrators completed questionnaires for 6,672 youth in student sample (52 % of 12,790 originally selected students).	2-stage cluster sample of parents/guardians who were nonresponders in selection of student sample. Of 554 youth whose parents or guardians did not respond, 441 completed interview (80 %).
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"> <li>-Student/family characteristics.</li> <li>-Services received.</li> <li>-Employment, education, and independence outcomes.</li> <li>-Parent expectations of future achievements.</li> </ul>	<ul style="list-style-type: none"> <li>-Disabilities for which student received services.</li> <li>-Grade level.</li> <li>-Educational setting.</li> <li>-Courses taken.</li> <li>-Grades.</li> <li>-Related services provided.</li> <li>-Intelligence test score.</li> <li>-Minimum competency test experiences.</li> <li>-End-of-year status.</li> </ul>	<ul style="list-style-type: none"> <li>-School/student characteristics.</li> <li>-Type of special education services/instruction provided students in school.</li> </ul>	(Similar content as in parent/guardian survey).
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	Not relevant to this data set which is based on a sample of individuals with disabilities.			
DISABILITY DEFINITIONS AND CATEGORIES	Federal disability categories as reported by school personnel: LD-learning disability; MR-mentally retarded; SI-speech impaired; ED-seriously emotionally disturbed; OI-orthopedically impaired; D-deaf; HH-hard of hearing; VI-visually impaired/blind; DB-deaf/blind; OHI-other health impaired; MH-multiply handicapped.			
DISABILITY CHARACTERISTICS OF SAMPLE	Sample estimates of number of special education students by categories compared to counts in 10th Annual Report to Congress. Ratio computed which reflects extent to which NLTS sample estimates over (ratios > 1.0) or under (ratios < 1.0) represent federal counts. Ratios presented here are average ratios reported for each category across three age groups. LD = .96; ED = .88; SI = .69; MR = 1.11; VI = 1.12; D/HH = 1.26; OI = 1.08; OHI = .84; MH = .94; DB = .21; Total = .97. (NCE/K. McGrew & A. Spiegel 2-17-92 Rev)

DATA SOURCE	Parent/Guardian or Youth	School Records	School Administrator	School Staff
COLLECTION METHOD	Structured Interview or Survey	Abstract of Transcripts	Questionnaire	Questionnaire
<b>SAMPLE DESIGN/ DESCRIPTION</b>	Subjects were drawn from NLTS Base Year sample. Of original 8,658 interview attempts, 5,890 completed interview (68%), 339 completed partial interview (3.9%) and 455 completed mail survey (5.3%). Data was gathered for 6,684 (77.2% of original 8,658) youth.	Data from students in selected sample in grades 9-12 during the 1990-91 school year. Transcript data collected for 7,271 students. Additional course description information not covered in typical transcript forms collected for 414 students.	Questionnaires completed for 739 youth enrolled in school during the 1990-91 school year.	Information collected on 645 youth enrolled in school during 1990-91 school year.
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-Student/family characteristics.</li> <li>-Services received.</li> <li>-Employment, education, and independence outcomes.</li> <li>-Parent expectations of future achievements.</li> <li>-School enrollment status.</li> <li>-Residential arrangements.</li> <li>-Level of independence.</li> <li>-Employment outcomes.</li> </ul>	<ul style="list-style-type: none"> <li>-Courses taken and credits.</li> <li>-Grades.</li> <li>-Non-school work experiences.</li> <li>-Grade level.</li> <li>-Attendance.</li> <li>-Type and amount of Special Education services.</li> </ul>	<ul style="list-style-type: none"> <li>-School/student characteristics.</li> <li>-Type of school.</li> </ul>	<ul style="list-style-type: none"> <li>-Outside services.</li> <li>-Transition planning.</li> <li>-Parent involvement.</li> <li>-Diagnostic test results.</li> <li>-Educational performance.</li> <li>-Disability characteristics.</li> <li>-Educational services received.</li> </ul>
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	Not relevant to this data set which is based on a sample of individuals with disabilities.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	LD-learning disabled, aphasic, dyslexic; ED-emotionally disturbed/behaviorally disordered; EMR-mildly mentally retarded; TMR-moderately mentally retarded; SMR-severely mentally retarded; OI-orthopedically impaired, physically handicapped; SI-speech or language impaired; D-deaf; HH-hard of hearing, hearing impaired; PS-partially sighted; CB-completely blind; DD-developmentally disabled; A-autistic; OHI-other health impaired; MH-multiply handicapped; O-other (specify); D-declassified (was determined to be no longer eligible for special education).			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	For all data sources the percentages of the original base year samples were: LD = 81%; ED = 69%; SI = 76%; MR = 85%; VI = 75%; HH = 66%; D = 84%; OI = 80%; OHI = 56%; MH = 69%; D/B = 77%. Overall total percentage of the original base year samples was 75%.

<b>TITLE:</b> National Survey of Family Growth (NSFG), Cycle IV (1986)		<b>DESIGN:</b> Cross-sectional & Longitudinal	<b>CONTACT:</b> Public Health Serv. NCHS 3700 E-W Highway Hyattsville, MD 20782	<b>PURPOSE:</b> To provide national data on the demographic and social factors associated with childbearing, contraception, adoption, and maternal and child health.
<b>COLLECTION CYCLE:</b> Periodic - every six years. Cycle I - 1973; Cycle II - 1976 Cycle III - 1982; Cycle IV - 1986		<b>SPONSOR:</b> US Dept. Health & Human Serv.		
<b>DATA SOURCE</b>	Household members			
<b>COLLECTION METHOD</b>	Interview			
<b>SAMPLE DESIGN/ DESCRIPTION</b>	Starting with Cycle IV, sample obtained from respondent households in National Health Interview (NHIS) survey sample, a stratified, multi-stage nationally representative probability sample. Cycle IV sample of 8,450 civilian, noninstitutionalized women from 15-44 years drawn from 1986 NHIS sample (see NHIS summary for more details). Survey response rate was 79 %. Longitudinal component added with Cycle IV and involved reinterviews of respondents approximately 30 months after initial interview.			
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"><li>-Adoption.</li><li>-Breastfeeding.</li><li>-Contraception and sterilization.</li><li>-Infertility.</li><li>-Live births and births expected.</li><li>-Miscarriages, stillbirths, and induced abortions.</li><li>-Prenatal care.</li><li>-Teenage sexual activity and pregnancy.</li><li>-Unmarried cohabitation.</li><li>-Use of family planning services.</li><li>-Wanted and unwanted births.</li><li>-Knowledge of AIDS.</li></ul>			
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	Individuals in institutions excluded. The use of third party proxies for individuals unable to respond due to a disability was not allowed. Therefore, individuals with these disabilities were excluded from the sample.			
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	None used.			
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	No disability specific information reported.

<b>DATA SOURCE</b>	Adult member of household	Medical records
<b>COLLECTION METHOD</b>	Interview/Questionnaire	Administrative records abstract
<b>SAMPLE DESIGN/ DESCRIPTION</b>	1986 followup (Wave 2) sample consisted of 3,767 nondeceased subjects who were 55 yrs. of age or above at the time of the base year NHANES 1 sample, and who were successfully traced (94 % of base year successfully traced). 3,608 of those traced (95.8 %) completed the interview. NHANES 1 base year sample was a three stage, stratified, nationally representative sample of 20,749 civilian, noninstitutionalized persons from 1-74 years of age between 1971 and 1975.	5,405 records were obtained (each representing an overnight facility stay) with 2,021 of the 1986 followup sample (53.75) having at least one stay in the final sample file.
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-Demographics.</li> <li>-Medical history.</li> <li>-Health care facility stays.</li> <li>-Functional status.</li> <li>-Cigarette smoking.</li> <li>-Alcoholic use.</li> <li>-Weight.</li> <li>-Vision and hearing.</li> <li>-Female medical history.</li> <li>-Use of community services for elderly.</li> <li>-Death information.</li> <li>-Other (activity level, urinary incontinence, changes in memory).</li> </ul>	<ul style="list-style-type: none"> <li>-Dates of admission and discharge.</li> <li>-Diagnoses.</li> <li>-Discharge status.</li> </ul>
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	No disability-specific exclusion criteria reported for 1986 followup. Information regarding individuals with disabilities collected through the use of adult proxies. No disability-specific exclusion criteria reported for base year sample (NHANES 1), which also used adult proxies for gathering information regarding persons with disabilities.	
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	1986 followup survey requested information in the following categories from the proxies regarding the "incapacitated" person: (a) hearing problem, (b) speech problem, (c) language problem, (d) poor memory, senility, or confusion, (e) institutionalized, (f) Alzheimer's disease, (g) other mental condition, (h) other physical illness and/or disability, (i) other non-health, or (j) other. Large number of detailed information gathered during base year (NHANES) in number of categories (e.g., physical, hearing, vision, psychology, etc.) that relate to the description of different categories of disabilities.	
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	469 (13.0 %) of the 1986 follow up sample had data provided by proxy due to "incapacities".

**DESIGN:**  
Cross-sectional

**CONTACT:**  
ETS  
Box 2923  
Princeton, NJ  
08541

**PURPOSE:** To assess the literacy of individuals seeking to enter or re-enter the work environment. In particular, to assess the literacy of those applying for Job Training Partnership Act (JTPA) programs and those claiming Unemployment Insurance (UI) benefits and/or applying for jobs in the employment Service (ES)

**COLLECTION CYCLE:**

Single collection period from 1989-1990

**SPONSOR:**  
Dept of Labor  
Employ & Trng

DATA SOURCE	Adult		
COLLECTION METHOD	Interview/Tests		
SAMPLE DESIGN/ DESCRIPTION	A multi-stage, stratified sample designed to be representative of eligible applicants in the JTPA programs and participants in the ES/UI programs. A total of 2,501 JTPA applicants (49% participation) and 3,277 ES/UI claimants (31% participation) agreed to participate.		
GENERAL VARIABLE DOMAINS PRESENT	<ul style="list-style-type: none"> <li>-Demographic Information</li> <li>-Educational background and experience</li> <li>-Labor force participation</li> <li>-Income</li> <li>-Literacy activities</li> <li>-Prose literacy</li> <li>-Document literacy</li> <li>-Quantitative literacy</li> </ul>		
DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES	None reported.		
DISABILITY DEFINITIONS AND CATEGORIES	Each subject was asked if he/she was currently diagnosed with any of the following: (a) learning disability, (b) eye trouble (not corrected by glasses), (c) hearing problem/deafness, (d) speech disability, (e) physical disability, (f) long-term illness (six months or longer), (g) no illness or disability.		
DISABILITY CHARACTERISTICS OF SAMPLE	No data reported.

**DESIGN:**  
Cross-sectional

**CONTACT:**  
ETS  
Rosedale Road  
05-P  
Princeton, NJ  
08541

**PURPOSE:** To assess the literacy skills of America's 21 to 25 year olds. To collect data that would provide a better understanding of the nature and extent of literacy problems facing young adults.

**COLLECTION CYCLE:** Single collection period, 1985

**SPONSOR:**  
US Dept. of Educ.  
OERI

DATA SOURCE	Young adult household members	Young adult household members	Young adult household members
COLLECTION METHOD	Questionnaire	Simulation tasks	Interview
<b>SAMPLE DESIGN/ DESCRIPTION</b>	Five-stage nationally representative sample of young adults from age 21 to 25 who lived in private households from April to Sept. 1985. 38,400 housing units screened. 3,618 assessments completed from the total of 4,494 subjects who were selected (80.5% completion rate). An additional 105 16-17 year old high school dropouts were assessed as part of a supplemental sample.		
<b>GENERAL VARIABLE DOMAINS PRESENT</b>	<ul style="list-style-type: none"> <li>-Family background.</li> <li>-Respondent characteristics.</li> <li>-Educational attainment and barriers.</li> <li>-Work related literacy concerns and issues.</li> <li>-Home/community related literacy activities.</li> </ul>	<ul style="list-style-type: none"> <li>-Prose literacy.</li> <li>-Document literacy.</li> <li>-Quantitative literacy.</li> </ul>	<ul style="list-style-type: none"> <li>-Use of spoken English (informative, narrative, &amp; persuasive).</li> <li>-Familiarity with types of printed materials.</li> </ul>
<b>DISABILITY RELATED EXCLUSIONARY RULES AND PROCEDURES</b>	No specific disability related exclusionary rules or procedures described in documentation. "Other" non-response/participation category did include those who did not complete the assessment due to illness, blindness, deafness, senility, or language barriers. Individuals living in group quarters or households excluded from sample.		
<b>DISABILITY DEFINITIONS AND CATEGORIES</b>	Subjects were asked if they had any of the following conditions before they were 18 years old, or if they had any of the conditions at the time of the assessment: (a) learning disability, (b) eye trouble - not corrected by glasses, (c) hearing problem/deafness, (d) speech disability, (e) physical disability, (f) long-term illness, or (g) none.		
<b>DISABILITY CHARACTERISTICS OF SAMPLE</b>	Conditions subjects reported having at the time of the assessment: (a) learning disability (2.7%), (b) eye trouble (5.4%), (c) hearing problems/deafness (2.5%), (d) speech disability (2.1%), (e) physical disability (2.6%), (f) long-term illness (1.5%).
